

OnDemand Suite

one-click site analysis

OnDemand

One click site testing, mapping and compliance

OnDemand Suite is a subscription web application that makes it quick and easy to create site maps and check web sites for multiple issues including accessibility, browser compatibility, web standards, usability and search engine optimization (SEO).

OnDemand Suite automates these checks and reduces web site testing to three simple actions:

1. Type in the URL you want to test
2. Click 'Scan Site' or 'Map Site'
3. Review the test results on the dashboard, then optionally set a schedule for daily, weekly or monthly scans

Overall Quality		27 pages with quality issues		better than average
Errors		16 pages with broken links or other errors		worse than average
Compliance		2 pages with compliance or legal issues		better than average
Standards		14 pages have W3C standards issues		better than average
Compatibility		0 pages with browser specific issues		better than average
Accessibility		26 pages with accessibility problems		worse than average
Usability		25 pages with usability issues		worse than average
Search		14 pages with search engine issues		better than average

From the dashboard you can drill down and see detailed problem descriptions and suggested resolutions.

Benefits

- **Test entire sites**
The service scans every link on your site, applying over 700 quality checkpoints to each page.
- **Reduce consultancy costs**
SortSite reduces the amount spent on third parties by enabling web site testing and search engine optimization to be done in-house.
- **Get more visitors**
SortSite applies search engine guidelines and SEO best-practice rules to ensure your pages perform optimally.
- **Retain more visitors**
Broken links, server error messages and usability problems drive visitors away. Find and fix these problems first.

Checkpoints

- **Accessibility** - check sites comply with W3C WCAG1, WCAG2 and Section 508
- **Broken Links** - check for broken links and images in HTML, CSS, PDF and Office docs
- **Spell Checking** - check spelling in English and French
- **Compatibility** - check for browser specific code, script and image formats
- **Privacy** - check for compliance with EU and US law
- **Search Engine Optimization** - check Google, Yahoo and Bing content guidelines
- **Standards** - validate HTML, XHTML and CSS
- **Usability** - check against Usability.gov guidelines
